THE PRACTICE OF SUCCESS - MEDIKER

The main specialty of
MEDIKER is ensuring
the accessibility and
quality of medical services.

The daily work schedule, high-quality service and developed structure allows the general public to receive medical services in convenient locations.

The client can seek qualified medical care 24 hours a day, 7 days a week, all year round!

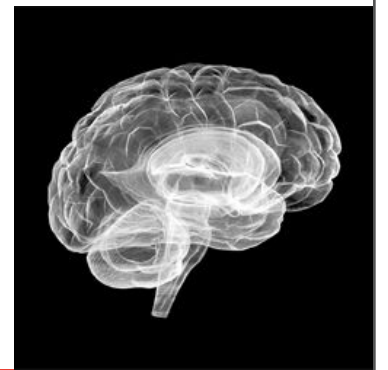

Medical centers are certified by the system of National Accreditation of Medical Institutions. The system of clinical control ensures the inspection of the quality of activities on a regular basis.

The key to success is the triunity of the main business units: Assistance + Industrial medicine + Medical Center. This allows the provision of comprehensive medical services to corporate clients.

The MEDIKER system of medical services for the adult and child population includes the following elements: diagnosis + treatment + medical rehabilitation + systemic prevention.

The systems approach allows for the

THAN 3,000 SPECIALISTS ■

■ THE CLIENT CAN SEEK
QUALIFIED MEDICAL CARE
24 HOURS A DAY, 7 DAYS A
WEEK, ALL YEAR ROUND! ■

effectiveness of synergy in health care, significantly reduce costs, effectively use available resources, increase mobility and rapid decision-making.

The most important component of the Company's success is its team. Today, MEDIKER employs more than 3,000 specialists, 23% of whom are doctors, 47% - middle paramedical personnel, 19% - supporting personnel, and 11% - managers.

Leading doctors and administrators underwent training, specialization and internship in the best international clinics and medical centers in the USA, Spain, Germany, South Korea and Israel. Most of the doctors have BSc honors degrees, categories, many of them are permanent members of international and republican associations in the health care system.

Among the first leaders of the MEDIKER group of companies, one third have MBA, MPH, DBA or PhD diplomas, including those obtained in Russia, the United Kingdom, the USA, Germany and other countries.

DEVELOPMENT STRATEGY OF MEDIKER GROUP OF COMPANIES

"The development strategy of the MEDIKER Group of Companies for 2015-2020" determined the priorities, goals and objectives of the activities. The strategy is based on comprehensive measures for the further development of the company, and sets targets in the priority areas. As the main goals, the strategy identifies the following four areas:

Target "Clients"

Goal: Availability and quality of medical services

Target "Human Resources"

Goal: Highly qualified personnel

Target "Business processes"

Goal: Effective management

Target "Finance"

Goal: Financial stability
And sustainable growth of the company

ACHIEVEMENT OF GOALS AND OBJECTIVES

These target directions and goals are equal in importance and priority. To implement the strategy, the principle of the "pyramid" is used, where qualified clinical and managerial staff, which are the basis of the Company's business, ensure the quality and promptness of business processes. Optimum business processes are necessary to ensure the satisfaction of customer needs. Satisfied customers ensure the achievement of the desired financial goals of the organization.

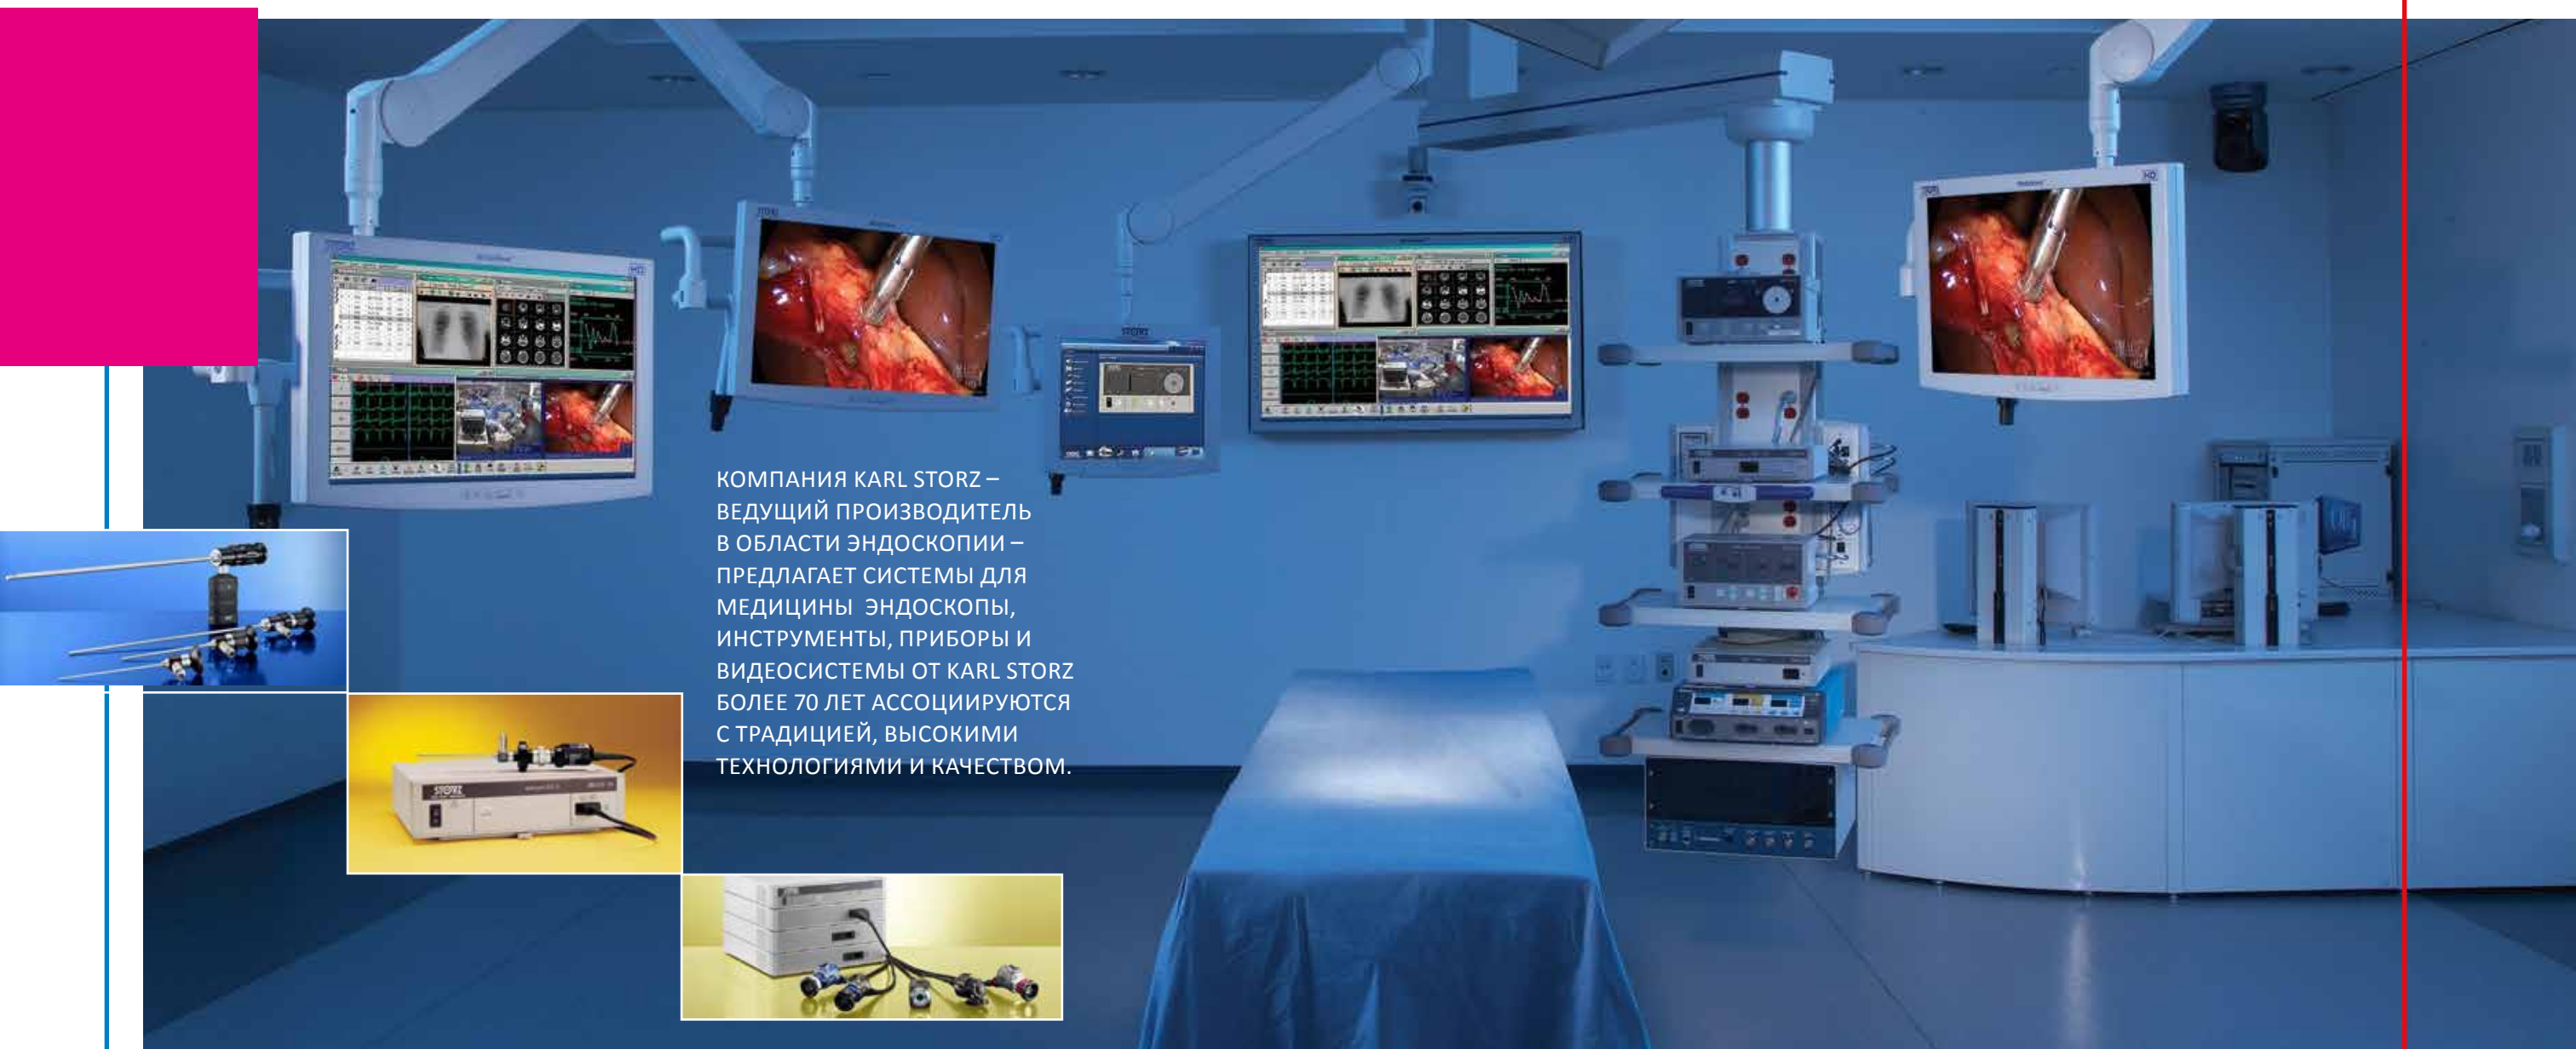

For the successful implementation of the strategy, long-term and annual plans have been developed, while the successful implementation of which guarantees achievement of the goals and objectives scheduled.

DEVELOPMENT OF IT-TECHNOLOGIES IN MEDICINE

The company "MEDIKER" actively cooperates with companies such as "Korkem Telecom" and "Akgun". "Korkem Telecom", being a system integrator for the group of companies "MEDIKER", has developed a highly effective and flexible software for medical insurance patients. The company "Akgun" has implemented an IT architecture with a private cloud and the integration of the Medical Information System (MIS) with the insurance base. The result of joint work with these companies is a high level of automatization of medical processes based on modern online technologies.

CORPORATE CULTURE

OVER 17 YEARS OF DYNAMIC DEVELOPMENT

PERSONNEL POLICY

Over 17 years of dynamic development, the company has developed a corporate culture based on the principles of respect, honesty, efficiency, care and trust.

THE COMPANY IS GUIDED BY THE FOLLOWING PRINCIPLES:

- Leadership.
- Social Entrepreneurship.
- Guarantee of quality and safety.
- Professionalism.
- Sustainable development.

CORPORATE ETHICAL VALUES:

- Duty and responsibility.
- Legitimacy and transparency.
- Observance of the rights of the client.
- Observance of the rights of employees.
- Self-improvement and development.
- Cooperativity and unity.
- Social responsibility and partnership.

The company employs more than 3.7 thousand people. The staff is the main asset of the Company, therefore MEDIKER is constantly working to improve social programs aimed at improving the welfare of employees. The Human Resources Management Policy, promotes the professional self-actualization of employees. The policy includes forms of remuneration, monetary and other ways of motivating staff as well as regulated principles and methods for assessing staff. There are various means for attracting specialists through the provision of housing, training abroad at the expense of the company, etc.

- Mentoring;
- New methods of diagnosis and treatment in leading medical centers;
- Exchange of experience and rotation within the group of companies;
- Participation in scientific and practical medical conferences; internship under international programs.

Training of specialists is based on analysis of the needs and feasibility, considering the results of earlier training and plans for the introduction of new technologies. Responsibility for the effectiveness of training and implementation of results lies with the trainees themselves and managers who sent specialists on the training programs. Partners in the training of specialists are the leading clinics in Germany, South Korea, Israel and Russia.

The company pays close attention to the safety and ergonomics of workplaces.

One of the most important objectives of the company is that of personnel development. The company invests significant funds in training employees both medical and administrative-management personnel. A Program for Continuous Professional Development of Employees has been adopted, which includes regular upgrading of skills. The mechanisms of continuous training in the following directions have been developed:

The method of cascade training is being practiced, whereby specialists who have passed the refresher courses are sent to other medical centers of the MEDIKER network to exchange knowledge with colleagues. Master classes are regularly held with the involvement of leading Kazakh and foreign specialists.

CORPORATE PUBLICATIONS

«MEDIKER» MAGAZINE

Since 2010 the «MEDIKER» magazine has been published to give coverage of the urgent issues of public health, medicine, health care and other important topics in the field. The magazine is published once a quarter with circulation of 7,000 copies in the Russian language.

The mission of the magazine is development of responsible attitude to health, healthy lifestyle promotion. The journalistic materials presented on the pages of the «MEDIKER» magazine gives the reader qualitative and reliable information

about the latest news in the medical field of the country, about the latest achievements of the industry, about the possibilities of treatment and prevention centers, and about the rights of the patient.

It is the first scientific-promotional journal of its kind, which is distributed free of charge. You can find it in many medical institutions of the country - in the subdivisions of the Ministry of Health and regional health departments, in local council offices, in the «MEDIKER» clinics and partner medical institutions, in total in more than 400 medical institutions of the Republic of Kazakhstan.

«MEDIKER ZHARSHYSY» NEWSPAPER

A monthly newspaper about health in the Kazakh language. The newspaper has been published since 2013, once every 2 months with circulation of 5000 copies in the Kazakh language.

It is distributed in medical institutions and in national companies of the Republic of Kazakhstan, in fields and in shift camps where workers of the oil, gas and other industrial branches work.

It covers medical news, articles, reports, current interviews, publications and analytics among the materials of the newspaper.

In addition, you can find a lot of information about the methods and new approaches in the

treatment of diseases and the recommendations from practicing doctors. Each publication of the newspaper highlights the news about health care and world medicine, analysis of the market for pharmaceuticals and medical equipment.

Famous scientists, heads of medical institutions and scientific research institutes, practicing doctors, etc. cooperate with the newspaper. Interviews with specialists from various areas of medicine are well received by our readers. The newspaper reflects the problems and questions that scientists and practicing doctors in different specialties of medicine are working on.

CORPORATE SOCIAL RESPONSIBILITY

"CARING, RESPECT AND LOVE"

TARGETED SPONSORSHIP

Much attention is paid to the participation in social and charity programs.

A long-standing tradition is the Donor Day, in which employees of the company are constantly involved.

To coincide with the Children's Day, various events and competitions are held to help disabled children and orphans.

MEDIKER sponsors various kinds of sporting events. Practically no large-scale sports events of corporate clients can do without medical support.

For many years MEDIKER has been the main sponsor for the projects of the famous Kazakhstan gymnast Aliya Yusupova on rhythmic gymnastics and sport dancing "Astana Open Spring Cup".

Every year, coinciding with the Victory Day in the Great Patriotic War the "Care, Respect and Love" campaign is carried out, all veterans registered in MEDIKER get free medical care, moreover, they are provided with home visits by their GP (General Practitioner) as well as a prescription delivery service.

MEDIKER provides targeted sponsorship to various charity foundations and boarding schools. It has become a tradition to equip a specialized Lyceum "Arystan" with medical equipment within the framework of charity.

The company actively participates in public work related to the formation of an effective system of medical care for citizens

of Kazakhstan. Experts of the company participate in meetings of public and state organizations connected with the formation of health policy and take part in the development of state programs. They actively share their experience and technologies with the institutions of the state medical sector.

MEDIKER company was the official partner of Astana Expo-2017, which provided medical services to visitors and exhibitors. For the entire period of preparation and holding of EXPO 2017 MEDIKER provided the participants and visitors with emergency medical services. In the territory of the exhibition facilities, there were 8 ambulances and 7 fixed primary health care centers. In the territory of the residential area "ASTANA EXPO Village" a 24-hour medical center was established for participants and employees of the exhibition.

MEDIKER is one of the largest taxpayers. Thus, in 2014, based on the results of tax reports, the company received the certificate "Leader of the Industry".

ACTIVITIES

NETWORK OF MEDICAL CENTERS

Medical centers that have a certificate under the system of the National Accreditation of Medical Institutions are in the cities of Astana, Almaty, Atyrau, Aktau, Zhanaozen, Ust-Kamenogorsk, Uralsk, Aksay, Shymkent and Aktobe. All medical facilities are staffed with qualified personnel and equipped with modern medical equipment. The

speciality of the centers is comfort, high level of service and daily work schedule. The total area of medical centers is over 50 thousand m2, the total productivity is more than 4 thousand visits per day, the provision of inpatient care - 300 beds, including up to 100 places for rehabilitation and health care. MEDIKER medical centers operate the

«ЖЕҢІС»

АППАРАТ РЕНТГЕНОВСКИЙ, ЦИФРОВОЙ

Глубоко модернизированная высокотехнологичная рентгеновская система для быстрой, легкой и безопасной диагностики заболеваний органов грудной клетки и черепа. Жеңіс достойно продолжает линейку флюорографов казахстанского производства, известных своей легендарной долговечностью и удобством эксплуатации.

Укомплектованный флэт-панелью – это последняя, на данный момент, разработка цифровых приёмников, представляющая собой полноформатную матрицу с высокой квантовой эффективностью. Аппарат рентгеновский цифровой «Жеңіс», укомплектованный флэт-панелью – это последняя, на данный момент, разработка цифровых приёмников, представляющая собой полноформатную матрицу с высокой квантовой эффективностью.

ЦИФРОВОЙ РЕНТГЕНОВСКИЙ АППАРАТ «ЖЕҢІС» С ФЛЭТ-ПАНЕЛЬЮ ПОЗВОЛЯЕТ:

1. Осуществлять полноформатные изображения размером 43x43 см, которого достаточно для проведения любых исследований;
2. Иметь высокую квантовую эффективность, за счёт чего достигается качественное изображение при минимальной лучевой нагрузке на персонал и пациента;
3. Достичь универсальности благодаря быстрой реакции матрицы, хорошего разрешения и частоты кадров;
4. Избавиться от геометрических искажений;
5. Занимать мало места (ширина – 15 мм.) — что позволяет использовать все пространственные возможности рентгеновского оборудования.

The main activity profile of the company is the production of various X-ray diagnostic equipment for medical purposes. Each year, new technologies are jointly mastered, the technical capabilities of the existing product line are improved, thereby the company is moving keep up with the times, improving the working conditions for medical staff and improving the quality of medical services provided. The company «MEDIKER» is interested in scientific development. One of the latest achievements of the company is the production of the LED lamp. As

a partner of MEDIKER, Aktubroentgen presents the latest X-ray diagnostic equipment which allows to improve the quality of various procedures related to both diagnosis and treatment. One of them is FLUKAR, a mobile digital fluorographic device placed in a comfortable van body based on an automobile chassis. The optimal solution for medical examination in rural areas, remote areas that are difficult to access, and also in cities and towns with the ability of departure to enterprises and organizations.

MEDICAL ASSISTANCE

“**M**EDIKER Assistance” is the division of the company which provides voluntary medical insurance services. Medical assistance companies provide services to clients of insurance companies in accordance with the terms of the insurance contract, the insurance program and the diagnostic and treatment

protocol. Insurance companies and assistance companies draw up a contract together for the provision of medical services. MEDIKER Assistance operates on the basis of a license for medical activities, it has a regional service throughout the region of Kazakhstan, its own Network of Medical Centers, qualified medical coordinators and family doctors.

To create a database of clients and professional activities in MEDIKER Assistance there is an automatic database that conducts the following:

- The analysis of expenses on the write-off items;
- Analysis of insurance claims of policyholders for a certain period;
- Statistics (percentage ratio for each health facility) of prescriptions;
- The analysis of expenses in the context of health facilities;
- Registration of hospitalization cases;
- Monitoring of the condition of seriously ill patients;
- Fixing cases which exceed the limits of the amount under the contract/ agreement.

MEDIKER's partners are within the top 10 largest insurance in Kazakhstan, and about 400 medical organizations of state and private ownership. MEDIKER Assistance expert service guarantees clients and partners the adequacy and objectivity of payments, the rational use of insurance limits, and the high quality of medical services provided.

MEDIKER Assistance's clients are made up of approximately 300 Kazakhstani and foreign companies, employing almost a quarter of a million people. This indicator is growing from year to year, the average growth rate is 9.4%. Achieving such dynamics is due to holding a competitive advantage - the availability of a wide network of partner clinics in Kazakhstan and abroad.

АССИСТАНС – от французского assistance – помощь. **МЕДИЦИНСКИЙ АССИСТАНС** – это медицинская помощь организационного характера, направленная на получение клиентом медицинских услуг с наибольшей экономией времени, лучшим качеством и комфортом.

GROUP OF COMPANIES MEDIKER

Medicell Bank of stem cells

Specialization is cryopreservation of hematological stem cells of umbilical cord blood.

"Medicell" is a corporate scientific and innovation center of MEDIKER, which develops a unique direction of using cellular technologies in medicine. "Medicell" is the first company in Kazakhstan which created a stem cell bank. The use of stem cells is an actual trend in the development of modern medicine in various areas of prevention and treatment of cancer, developmental malformations, blood diseases, etc. Even now, stem cells are used in the treatment of more than 100 diseases. Stem cell transplantation is the only radical method of treatment for diseases of the immune system and blood.

"The new era of personal medicine is an era of molecular genetic medicine that will improve quality and life expectancy"

Preservation of umbilical-placental blood is a huge breakthrough in medicine, "biological insurance" from many diseases. The cord blood can be collected and stored only once in a life, during childbirth, and it will protect the donor child for its entire life. Preservation of cord blood is a truly invaluable gift to man. "Medicell" provides Kazakhstan citizens with this opportunity.

UNIQUE DIRECTION

STEM CELL BANK

"Medicell" specialists take a material sample, extract stem cells, concentrate them and prepare them for long-term cryogenic storage of stem cell samples. Samples are stored in a software freezer "IceCube" at a temperature of minus 196°C. Preservation of stem cells allows a person to take maximum advantage of the latest achievements of modern science. Studies in the field of cellular medicine are among the priority, the true value of preserving stem cells can be appreciated in the long term. Therefore, the decision to keep the child's stem cells in the stem cell bank "Medicell" can become one of the best decisions in life. In addition, the company "Medicell" founded a laboratory for stem cells research. This allows the control of stem cell quality, to study the mechanisms

of vital activity and differentiation of stem cells, in order to develop new therapeutic preparations. The laboratory is equipped with high-tech equipment for genetic research in molecular biology and genetics. As a result, there is a unique automatic system for extracting DNA from the blood - AutoGenFlex 3000 installed on the basis of "MEDICELL". It allows extracting genomic DNA from large volumes (1-5 ml) from whole fresh and frozen blood, as well as from leukocyte film. The system is designed and manufactured in cooperation with QIAGEN, the world leader in the development of innovative technologies and the manufacturing of products for the separation and purification of nucleic acids.

GROUP OF COMPANIES MEDIKER

@SMARTPHARM

The Network of Family Pharmacies is for quality provision of drugs with a pharmacists available online 24 hours a day for consultations regarding the purchase and use of medicines.

Initially, the network of retail pharmacies was represented on the market under the brand MEDIKER and its subsidiary MediLAB. For more than five years the pharmacies had successfully worked in the pharmaceutical sector. In 2016, the functions and tasks for the new brand Network of Family Pharmacies "@SMARTPHARM" were expanded. Today the pharmacy network includes a call-center and 19 pharmacies in various regions of Kazakhstan. Pharmacies offer over 4,000 items of medicines, hygiene products and medical cosmetics, including goods for mothers and children, medical products, dietary supplements and vitamins. The network of pharmacies receives only high-quality medicines from the largest, time-tested suppliers and manufacturers. The company operates on the principle: "@SMARTPHARM" is your family pharmacy".

INTERNATIONAL PROJECTS

MEDICAL TOURISM -
THIS IS THE PRACTICE OF PROVIDING
MEDICAL CARE OUTSIDE THE
COUNTRY OF RESIDENCE

A promising and rapidly growing area is medical tourism, which is gaining popularity in Kazakhstan. MEDIKER company, which has an extensive network of foreign partners, actively joined this work. Medical tourism is the practice of providing medical assistance outside the country of residence or combining holidays abroad with medical advice and treatment in foreign clinics. Such services are offered by many countries that have health resorts or international level clinics in their territory: Spain, Germany, the Czech Republic, Hungary, Israel, China, Greece, Thailand, Malaysia and some others. The organization of such trips is dealt by the partner company Apple Tour, which provides a full package of services: preparation of documents necessary for travel (air tickets, visas, insurance, contracts, etc.), arranging the accommodation of the patient accompanying persons, and if necessary – a highly qualified interpreter for the duration of the trip. Managers of the Apple Tour, take on all the paper-organizational issues, something that simplifies and speeds up the patient's journey to the place of treatment and makes it comfortable and ergonomic for him/ her. Patients are also offered assistance in choosing a country for medical or health tourism, taking into account the many factors - from the profile of the clinic or the determination of the resort to the possible outcome of treatment.

Telemedicine equipment is also presented at the international exhibition «ASTANA EXPO 2017».

INTERNATIONAL PROJECTS

MEDIKER SPAIN JOINT CLINIC OF REGENERATIVE MEDICINE IN BARCELONA

A high-tech clinic of premium class "Regenerative Medical Solutions Barcelona", created in conjunction with the medical center of Spain, specializes in regenerative medicine in the field of traumatology and sports trauma, aesthetic surgery and dermatology, ophthalmology and dentistry. MEDIKER Spain operates in five important areas:

MEDIKER Spain

OUTPATIENT SERVICES:

- Consultations;
- Check-up programs (preventive examination at the European level);
- Day hospital.

AESTHETIC MEDICINE:

- Dentistry;
- Plastic surgery.
- Sports medicine;
- Rehabilitation;
- Prevention of Traumatism.

REGENERATIVE MEDICINE:

- Anti-aging programs;
- Personalized oncotherapy;
- Stem cells.

SURGERY AND HOSPITAL SERVICES:

- Minimally invasive operations;
- General surgery.

PROSPECTIVE AREAS:

- Obstetrics;
- Hemodialysis;
- Apheresis.

INTERNATIONAL PROJECTS

It should be noted that at present, regenerative medicine is focused on the restoration, replacement or regeneration of tissues, or organs damaged as a result of trauma, illness or simply the natural aging process. The application of this area of medicine can be briefly characterized by three interrelated approaches:

- Regeneration involves the delivery of specific types of cells or cellular products to diseased tissues or organs, where they eventually restore the function of the vital functions of the tissue or organ.
- Rejuvenation means increasing the natural ability of the body to self-heal with the use of self-healing processes.
- Replacement involves the use of healthy cells, tissues or organs of a living, or deceased donor to replace the damaged ones.

It is expected that specialists from the Association of Independent Doctors of Spain will work in the clinic. In addition, the MEDIKER clinic in Barcelona will organize training programs (courses, scientific conferences and meetings, internships) for both its employees and health workers of other health care institutions, but already on a fee basis. For this purpose, up to 50 international doctors per year will be attracted to "MEDIKERSpain" training center every year.

In addition, surgeons from this clinic will be involved in conducting operations in Kazakhstan. And master classes from Spanish surgeons of each chosen specialization will be organized jointly with MEDIKER in Kazakhstan.

COOPERATION WITH LEADING INTERNATIONAL UNIVERSITY CLINICS

The company "MEDIKER" has a wide network of partners abroad. There are contracts with the largest university clinics in Freiburg (Germany), Navarra (Spain), a group of clinics "Quirón" (Spain), clinic "Delfos" (Spain), a group of private clinics in Switzerland "Swiss Medical Network", Hospital Seoul University and the Medical Center "Samsung" (South Korea) and others. Within the partnership, there is experience and technologies are shared, organization of master classes, training of doctors MEDIKER.

PROJECTS OF THE STATE-PRIVATE PARTNERSHIP

The market of medical services in Kazakhstan has been forming for more than 25 years. Along with the development of public medicine and the process of reforming the healthcare sector, there is a growing need for a large-scale development of private medicine. The need is growing both quantitatively and qualitatively, and the task of MEDIKER is to provide people with the opportunity to receive medical services that meet their expectations. One of the main tools for the development of private medicine today is the mechanism of public-private partnership (PPP), which is a combination of long-term interaction between the state and business for solving socially significant problems on mutually beneficial

terms. In the health sector, such partnerships provide an opportunity to improve the health of the people, maintain social stability in society, raise the quality of medical care to the level of world standards, acting as an effective tool for health reform. Positive feedback on government initiatives and willingness to cooperate are manifested by companies that have extensive experience in implementing large-scale projects. Among them, MEDIKER is the industry leader, the largest in terms of staff, geography of presence, the number of medical centers across the country and many other parameters. As early as in 2011, under the "Business Road Map 2020" program, MEDIKER implemented a project for the construction

and commissioning of the multi-profile medical center "MEDIKER Atyrau". The opening ceremony was attended by President of Kazakhstan Nursultan Nazarbayev, who highly appreciated the work of the company's staff. In 2013, "MEDIKER Kulsai" medical center was opened, the project received funding through the Damu Entrepreneurship Development Fund under the program "Support for New Business Initiatives", which provides for the provision of state support for the implementation of projects on accelerated industrial and innovative development of the Republic of Kazakhstan.

The goal of the company's participation in PPP projects is the further development of medicine in Kazakhstan, the provision of more quality medical services delivered to the general public in the shortest possible time and a high level of service. Within these projects, medical centers will be established with modern equipment and software provided by MEDIKER. To implement the technological regulations that meet international standards, an effective mechanism of management and return of investment as well as new facilities will be transferred to the trust management of MEDIKER for the term of the PPP contract.

Cooperation in PPPs benefits both the general public and the state. Partnership with MEDIKER is private investment in infrastructure, equipment, personnel, information systems, such cooperation allows to avoid expenses for repairs, maintenance of equipment and other purposes.

The clinics will be located within walking distance, they will be able to provide the general public with a guaranteed amount of free medical care and identify diseases at an early stage. The main effect of PPP is high quality medical services according to international standards, increasing the level of diagnostics and treatment of diseases and, as a result, improving the health of the people.

НОВЫЕ НАПРАВЛЕНИЯ ДЕЯТЕЛЬНОСТИ

Today within the framework of PPP such projects as "Medical center on a turn-key basis" are implemented. The company incurs costs from the construction of the building to the operation of the center for 10 years. In 2017 - 2018, MEDIKER is planning to implement three projects:

Outpatient and polyclinic complex in Aktobe for 300 visits per shift;

Construction and operation of the city polyclinic for 250 visits in the town of Rudny, Kostanay region;

"Center for Family Health" for 150 visits in the city of Astana, "Ondiris" residential area.

PARTICIPATION IN THE INTERNATIONAL PROJECT OF EXPO - 2017

In May 2016, MEDIKER signed a memorandum of cooperation with the national company Astana EXPO-2017, thereby becoming the medical operator and partner of the International Exhibition. Within the framework of the agreement MEDIKER directed most of the investments for the opening and equipping of a medical center, seven medical posts and eight ambulance brigades on special vehicles within the area of the exhibition.

FIRST AID TREATMENT

During the EXPO 2017 event, MEDIKER provides emergency medical services to visitors for three months. The location of seven medical centers and eight ambulance fleets in the area allows rapid access to medical services advice and evacuation to the center. All medical centers and posts are equipped with modern technological medical equipment and essential medicines.

PARTNER OF THE INTERNATIONAL EXHIBITION

"It is very important for us that such a large and recognizable medical company in Kazakhstan is ready to take part in such a large-scale event as EXPO 2017. MEDIKER has the most extensive branch network in Kazakhstan," – says Akhmetzhan Yesimov, Chairman of the Board of JSC "NC Astana EXPO 2017".

"MEDIKER EXPO" MEDICAL CENTER

"MEDICER EXPO" is the only medical center in the territory of "Expo Village", which provides services to residents and guests of the capital in the territory of EXPO. The center is equipped with equipment from renowned manufacturers in Germany, Japan and South Korea. The staff of the medical center provide qualified medical assistance to the residents of "Expo Village" around the clock. The specialty of the medical center is its unique design and navigation, which includes online communication with international insurance companies and accredited consulting centers in Freiburg, Barcelona, Shanghai, Seoul and other assistance centers. The staff of the medical center speak Kazakh, Russian and English.

PARTICIPATION IN THE INTERNATIONAL PROJECT OF EXPO - 2017

EXHIBITION STAND

MEDIKER is the first Kazakhstani medical company in the history of EXPO exhibitions, which presents its own stand. Medicine is the science of Man, the mystery of his/her birth, life and death. It is something very human and at the same time divine, a man as the pinnacle of everything created in the world, a mystery yet unraveled. The design of the MEDIKER exhibition space includes the image of Woman, as a symbol

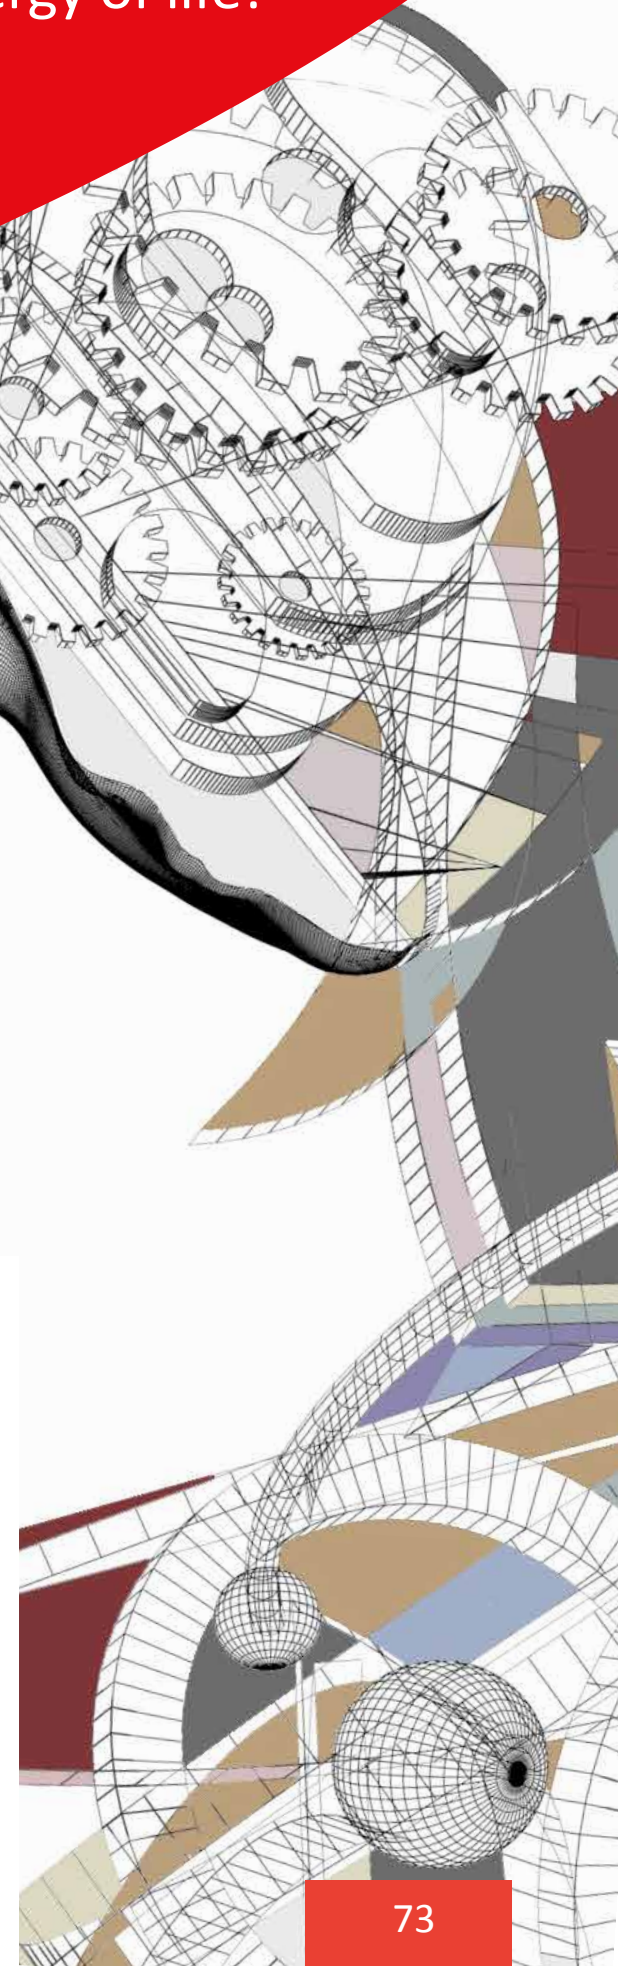

Future energy of life!

of the mother of mankind. Modern medical technologies serve to protect her health and well-being, guarantee the healthy provision of her future generations, the healthy future of society, the personification of the image of the baby in the womb of the Mother. The energy of the future is the health of the child and his/ her Mother.

The main message of the exhibition stand concept means health is the basis of life, and life is divided into past, present and future. If you conduct a timely diagnosis of health today, you can avoid various health problems tomorrow, improve the quality of life - saving the ENERGY of LIFE and CREATION.

The stand presents promising trends and areas in the advancement of medical science and medical technologies.

PARTNERSHIP

TECHNOGYM— МИРОВОЙ ЛИДЕР В ПРОИЗВОДСТВЕ ПРОФЕССИОНАЛЬНОГО СИЛОВОГО И КАРДИОТРЕНАЖЕРНОГО ОБОРУДОВАНИЯ ДЛЯ МЕДИЦИНСКИХ И РЕАБИЛИТАЦИОННЫХ ЦЕНТРОВ. ВСЯ ПРОДУКЦИЯ TECHNOGYM РАЗРАБОТАНА НА ОСНОВЕ МЕДИЦИНСКИХ ИССЛЕДОВАНИЙ В ОБЛАСТИ ЗДРАВООХРАНЕНИЯ И ФИЗИЧЕСКОЙ КУЛЬТУРЫ, ВКЛЮЧАЯ КАЖДЫЙ УРОВЕНЬ И АСПЕКТ ДВИГАТЕЛЬНОЙ АКТИВНОСТИ.

The company «Technogym» is a partner of the company «MEDIKER» at the international exhibition «ASTANA EXPO 2017». «Technogym» company is engaged in development of a sports direction in Kazakhstan and will present the innovative simulators for representation of sports medicine in Kazakhstan. These simulators allow you to individually adjust the optimal athletic load on the body. Simulators from the company «Technogym» are also presented at the international exhibition «ASTANA EXPO 2017».

PLANS AND PROSPECTS OF THE COMPANY

DEVELOPMENT OF SPORTS MEDICINE

HUMAN RESOURCES DEVELOPMENT

MEDIKER employees are subject to high demands, dictated by corporate standards. In this regard, the company's ongoing plans include the development of personnel. In 2017 it is planned to create its own corporate training center.

DEVELOPMENT OF INNOVATIVE MEDICINE

MediCell company will continue development of cellular technologies in Kazakhstan. Expanding the cryo-storage capacity will allow placement of up to four thousand umbilical cord blood samples. The advantage of the method is that it is not necessary to search for a suitable donor, since the donor and the recipient are the same person.

SPORTS MEDICINE

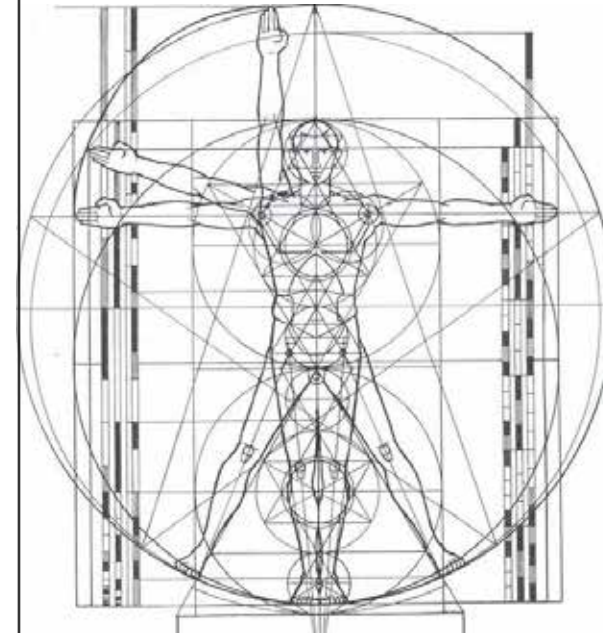

MEDIKER is developing sports medicine in Kazakhstan and provides a range of services for professional and amateur athletes. The range of services offered: functional diagnostics, rehabilitation, exercise therapy, nutrition, outpatient and inpatient treatment of athletes, taking into account the circumstances of anti-doping regulation. The world's best practices are being introduced through using innovative equipment and technologies, employing foreign doctors and specialists in sports medicine, as well as intensive education of personal medical staff in order to achieve better sports results by Kazakhstan athletes and support mass sports in our country.

PARTICIPATION IN THE DEVELOPMENT OF THE HEALTH CARE SYSTEM IN KAZAKHSTAN

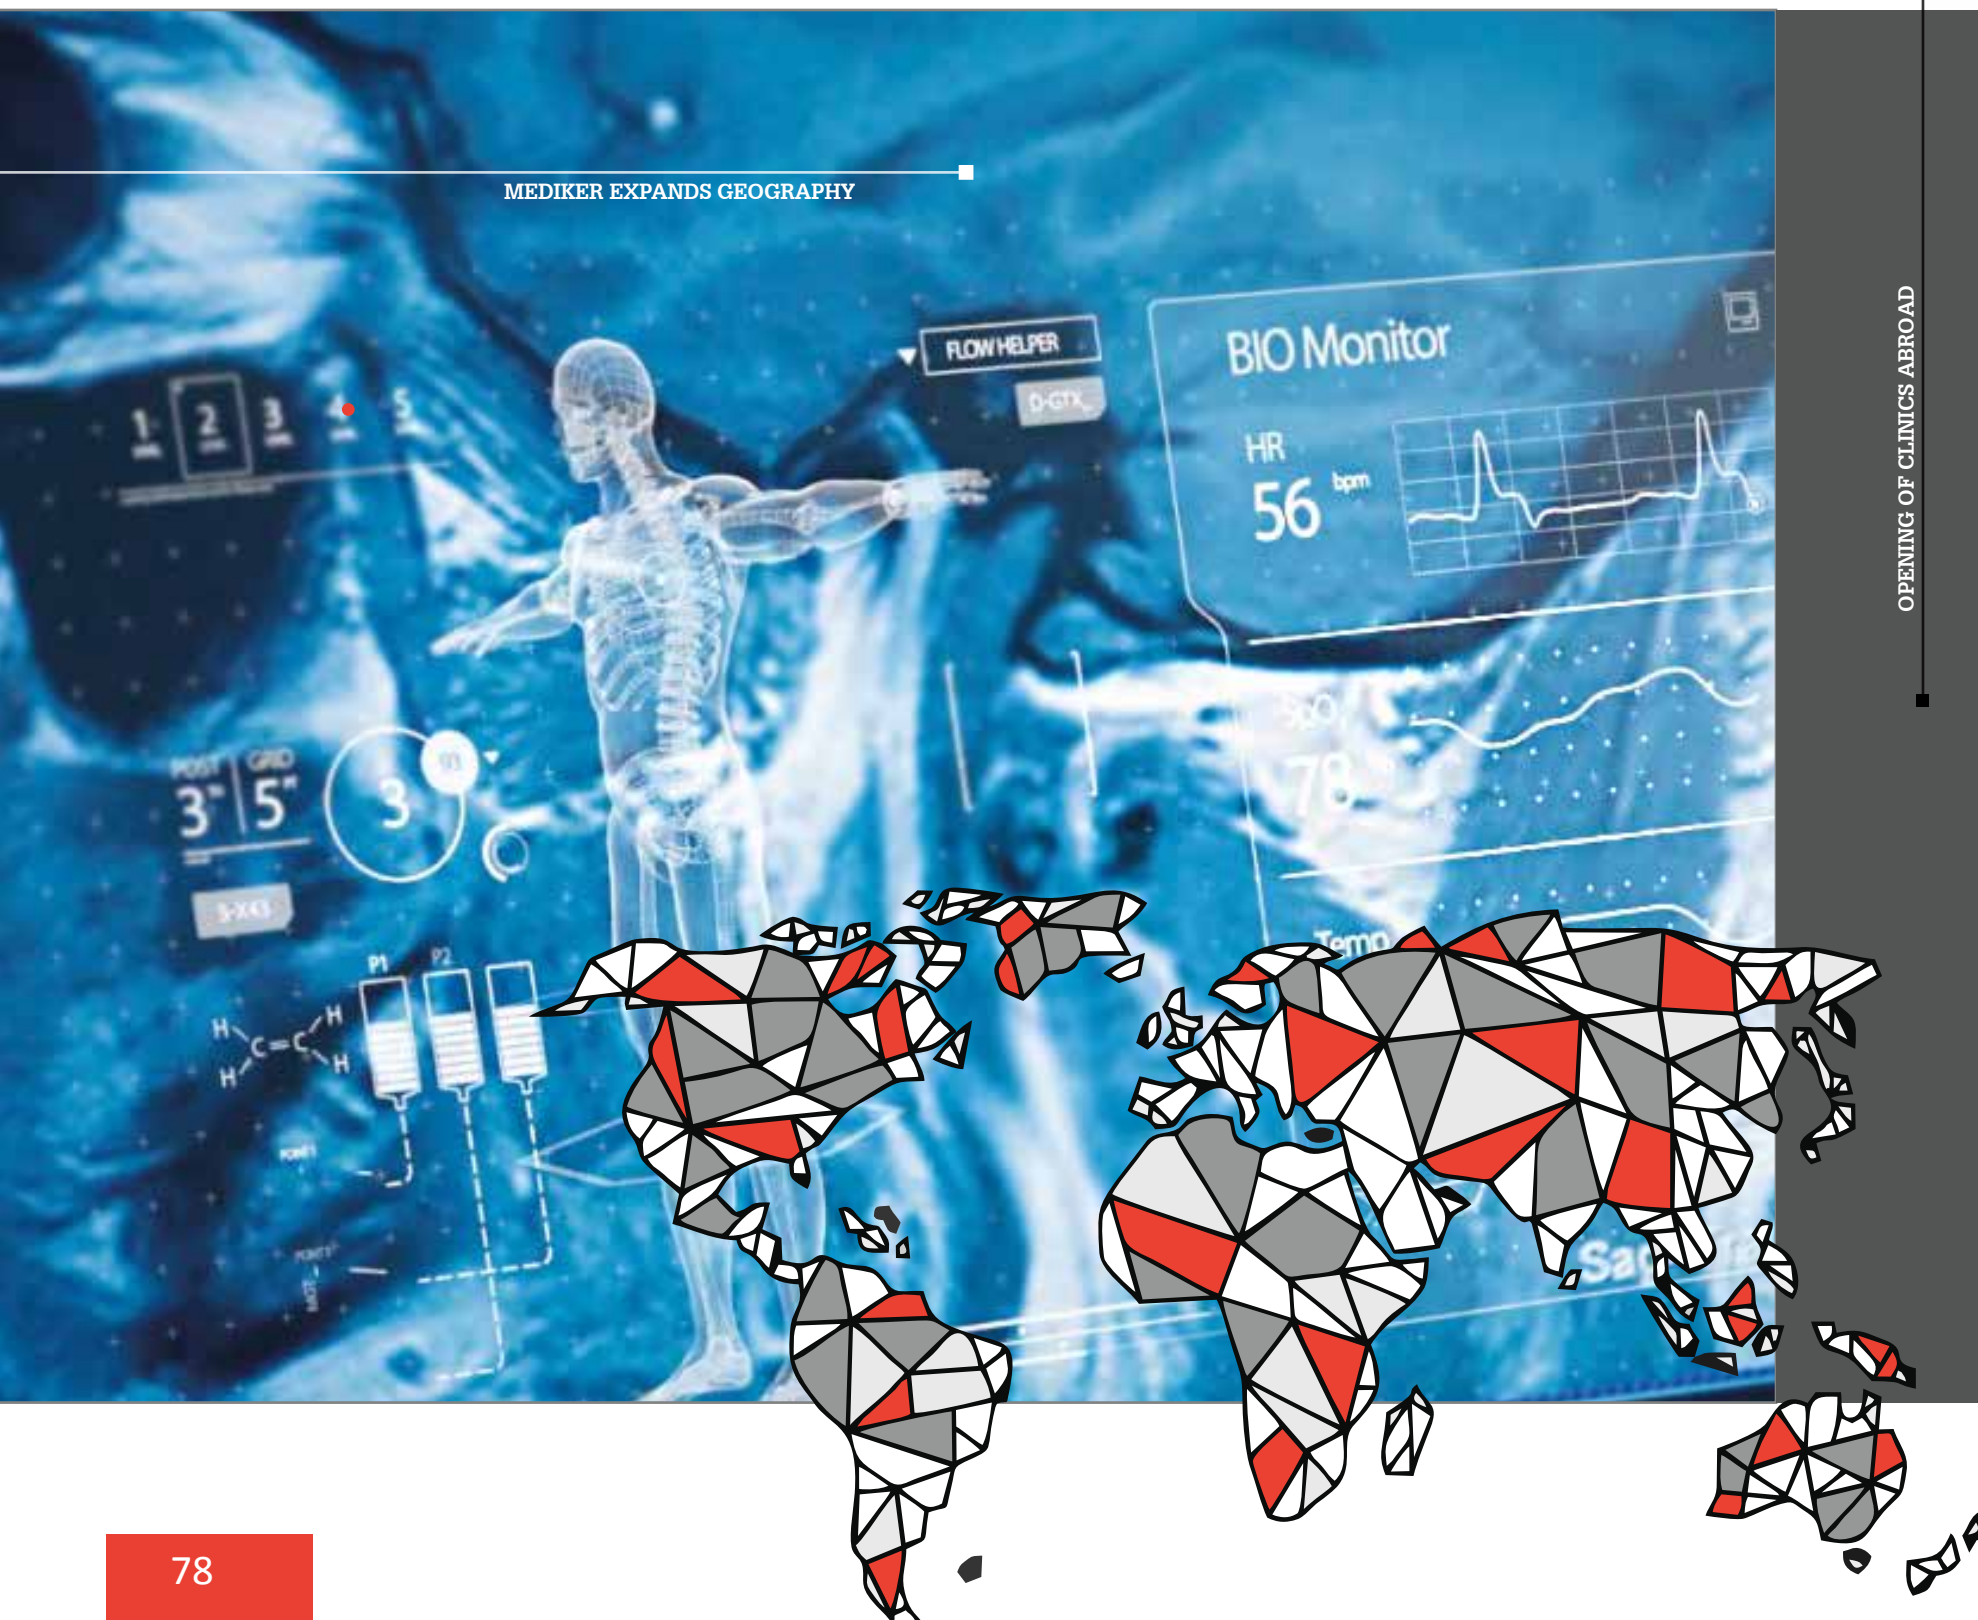

MEDIKER makes a significant contribution to the implementation of state health programs in Kazakhstan. We actively participate in the development of public-private partnerships and plan to build and operate various public health facilities in cooperation with local government bodies.

The company participates in the improvement of legislation in the sphere of healthcare and business development. Modifications and amendments to the regulatory and legal acts of the Republic of Kazakhstan, regulating the issues of biotechnology, have been initiated, proposals have been made to the Concept of the introduction of compulsory social health insurance.

PLANS AND PROSPECTS OF THE COMPANY

MEDIKER EXPANDS GEOGRAPHY

OPENING OF CLINICS ABROAD

ACCESS TO FOREIGN MARKETS

In the near future, the company is planning to open clinics abroad. The project of creating medical centers in Russia, Spain and other countries is being developed. MEDIKER - Industrial Medicine plans to expand the geography of its activities, offering health services to enterprises in the CIS countries.

EXPANSION OF THE MARKET SHARE

MEDIKER expands the geography of its activities, opening medical centers in various regions. Recognizing its role as a socially responsible company, MEDIKER synchronizes its plans with social, economic and political trends, in particular, with the State Program for the Development of Regions, the plan for industrial and innovative development of Kazakhstan, and the needs of its clients.

It is planned to introduce telemedicine in all operating medical centers to organize consultations by leading specialists of the company, Kazakhstan and foreign countries.

PARTNERSHIP

J SC «Kazakhinstrakh» has a license for the insurance (reinsurance) activities in the «general insurance» industry and specializes in various types of insurance for individuals and entities: compulsory and voluntary insurance, civil liability insurance, vehicle insurance, property insurance and personal insurance. One of the main types of insurance is Voluntary Health insurance - a form of protection of the insured's property interests in the event of costs associated with paying for the treatment of the insured. Provision of medical services under these agreements is carried out through the involvement of MEDIKER Assistance (a subsidiary of the MEDIKER Group of Companies), which has a team of family doctors across the country and a network of accredited medical and preventive institutions, which includes about four hundred
